

REVConnect® Coupler Patch Panels

Product Bulletin

A unique patch panel offering a cost-effective, high-performance solution for zone cabling

To support faster deployment in enterprise networks, REVConnect Coupler Patch Panels are based on innovative REVConnect termination technology, designed with time-saving features for installers and end-users. The patch panels can be terminated from the rear or front. Removable six-port modules provide front access termination and have a unique cable-measuring feature that keeps cables organized and improves cable management.

Benefits

- Reduce costs and inventory by reusing leftover shorts to create core-to-core assemblies in place of patch cords for cut-to-length patching
- Simplify logistics with one termination method for patch panels and workstations
- Easy project planning and material ordering with one part number
- Efficient assembly in live equipment cabinets and wall-mount racks
- No extra accessories needed for tidy cable management
- Complies with ANSI/TIA-606

Features

- User interface uses REVConnect receptacles
- Fully assembled with REVConnect couplers that are ready to terminate
- Single-port modularity ensures quick, cost-effective repair if a connection goes bad
- Cable management bar(s) included
- Pre-printed ID card and labeling window for port identification
- Label sheets (sold separately - AX107527) can be printed using LabelFlex software (optional)
- Category 6A flat configuration: choose between 24-port 1U or 48-port 2U

Key applications

- Applications without RJ45 interfaces
- Consolidation points
- High-density interconnects and cross connects

Ordering information

REVConnect coupler patch panels

Description	Belden part number
	Black panels
Category 6A	
10GX REVConnect coupler patch panel 24-port, 1U	RVACPF1U24BK
10GX REVConnect coupler patch panel 48-port, 2U	RVACPF2U48BK

Accessories

Description	Belden part number
Labeling	
LabelFlex labels for REVConnect patch panels (64 labels/sheet, 10 sheets/pack)	AX107527
Replacement items
