

Cable Ladder Rack Floor Mount Bracket *CLFMB Series*

Floor mount bracket designed to provide stable base support for ladder rack systems in freestanding or floor-supported installations.

Key Features and Benefits

- 16-gauge steel construction provides durable structural support for ladder rack systems in floor-mounted applications.
- Designed to anchor ladder rack systems directly to the floor for stable cable routing infrastructure.
 - **C4K-Z4** Floor mounting hardware sold separately.
- Provides a secure base when wall or ceiling mounting is not feasible or desired.
- Supports freestanding ladder rack configurations and equipment row transitions.
- Compatible with CL Series ladder rack systems and common cable runway platforms.
- Enables flexible system layouts in open environments and equipment rows.
- Improves system stability and load distribution in long ladder rack runs.
- Ideal for data centers, telecom rooms, and network installations requiring floor-supported routing.
- TAA-compliant, manufactured in North America supports government procurement requirements and ensures consistent quality.
- Black powder coat finish (GREENGUARD, TSCA, RoHS compliant) supports environmental and durability requirements.

The CLFMB Series floor mount brackets provide a reliable solution for supporting ladder rack systems in floor-mounted installations. Designed for structural stability, they allow ladder rack systems to be installed in environments where wall or ceiling mounting is not practical.

With durable steel construction and flexible installation options, the CLFMB Series supports scalable cable routing systems in data centers, telecom rooms, and network environments.

Accessories

- Rack & Cabinet Bolt Down Kits

Part No.	Height	Overall Dimensions		
		Width	Mounting Plate Width	Depth
CLFMB	8.00	0.66	1.11	1.98

Where the CLFMB Series Works Best

- Data centers and server rooms
- Telecom and network installations
- Open floor environments
- Equipment row cable routing systems
- Installations without wall or ceiling mounting options

Best Applications for the CLFMB Series

- Supporting ladder rack systems from the floor
- Creating freestanding cable routing pathways
- Stabilizing ladder rack in open environments
- Supporting long cable runs between equipment rows
- Enabling flexible ladder rack layouts
