

10-32 Rack Screw & Finishing Washer Kit *1421 Series*

Classic 10-32 rack mounting screw kits with metal or nylon finishing washers for a clean, professional equipment installation.

Key Features and Benefits

- Heat-treated 10-32 steel rack screws provide dependable mounting for equipment installed in standard threaded rack rails.
- Available with either nickel-plated steel cup washers or nylon cup washers to match the appearance and protection requirements of your installation.
- Oval countersunk head creates a clean, finished appearance that's ideal for professional AV, broadcast, studio, and telecommunications installations.
- Slotted and Phillips combination drive provides installation flexibility using common hand tools.
- Cup washers distribute clamping force over a larger area, helping reduce the chance of marking equipment faceplates during installation.
- Available in 4, 25, 50, and 100-piece packages to support everything from individual equipment installs to large rack deployments.
- Replacement metal and nylon cup washers are available separately for maintenance and service.
- Part of Hammond's Legacy Portfolio, delivering a proven mounting solution trusted by installers for decades.
- REACH compliant.

Phillips/Slotted Oval Head Screws

- 0.625" Length Machine screw.
- UNF-2A (10-32) Threaded.
- Nickel-plated finish.
- Heat-treated low-carbon steel to ANSI B18.6.3 standard.

Metal Cup/Finishing Washers

- Constructed of nickel-plated steel.
- Distributes tightening force evenly.
- Designed for oval-head screws.

Nylon Plastic Cup/Finishing Washers

- Constructed of nylon plastic.
- Distributes tightening force evenly.
- Outside diameter of 0.570".
- Overall height of 0.150".
- Designed for oval-head screws.

The 1421 Series combines classic 10-32 rack screws with matching finishing washers to provide a clean, professional method of mounting equipment to threaded rack rails. Available with either nickel-plated steel or nylon cup washers, the kits help distribute clamping force while creating the finished appearance traditionally used in audio, broadcast, telecommunications, and industrial rack installations.

Whether you're installing amplifiers, patch panels, switches, shelves, or other rack-mounted equipment, the 1421 Series delivers dependable performance with the polished appearance many installers still prefer. Multiple package sizes and replacement washers make it a practical choice for OEMs, maintenance departments, and service technicians.

This product is part of our trusted Legacy Portfolio, proudly offered for over 50 years. Consistently high quality, same unbeatable value. Frequently imitated, never matched.

1421100	Clamshell	100	100

10-32 Nickel Rack Screws AND Plastic Cup Washers

Part No.	Package Type	Qty of Screws	Qty of Plastic Cup Washer
1421A	Clamshell	4	4
1421A25	Clamshell	25	25
1421A50	Clamshell	50	50
1421A100	Clamshell	100	100

Replacement Washers

Part No.	Description
1421A25W	Package of 25 plastic cup washers
1421E25W	Package of 25 metal cup washers

Where the 1421 Series Works Best

- Audio and recording studio racks.
- Broadcast and AV equipment racks.
- Telecommunications and networking installations.
- Industrial equipment racks with threaded rails.
- OEM production and rack assembly.
- Retrofit and maintenance projects requiring a finished appearance.

Best Applications

- Mounting amplifiers, processors, and AV equipment.
- Installing patch panels, switches, and cable managers.
- Replacing worn or missing rack hardware.
- Creating a finished installation with decorative cup washers.
- Maintaining legacy rack systems.
