

Vertical Cable Manager with Door for C4 Server Cabinets **C4VFM**

Series

Vertical finger cable manager with door designed for structured cable routing inside C4 server cabinets.

Key Features and Benefits

- 16-gauge steel body provides durable vertical cable routing and support within server cabinet environments (approx. 6 lb shipping weight for 44U models).
- Fingers and door clips are constructed from UL94-V0 rated polycarbonate, supporting cable protection, safety, and long-term durability.
- Removable aluminum cover provides cable containment and a clean, professional installation.
- Designed for **C4**, **C4RR_S**, **C4RR_A**, **C4RR_D**, and **DCZ4** cabinet series for fully integrated cable management.
- Includes mounting hardware.
- Finger-style duct organizes cables at each rack unit for improved accessibility and cable separation.
- Supports routing of fiber, Cat6/6A, and coax cables in high-density cabinet environments.
- Available for multiple cabinet heights (42U and 44U) and widths (24" and 30" frames).
- Includes mounting hardware for fast installation.
- TAA-compliant, manufactured in North America supports government procurement requirements and ensures consistent quality.
- Black powder coat finish (GREENGUARD, TSCA, RoHS compliant) supports indoor air quality and environmental compliance.

The C4VFM Series vertical cable managers provide a structured solution for routing and organizing cables within C4 server cabinets. Designed for seamless integration, they support high-density cable management while maintaining accessibility and airflow.

With 16-gauge steel construction, UL94-V0 polycarbonate fingers, and a removable aluminum cover, the C4VFM Series delivers durable, organized cable routing for modern data center and network environments.

Compatible with Cabinet Height	For Use with 24" Wide Cabinet Frame	For Use with 30" Wide Cabinet Frame
	No Cover	Cover Included
42U	C4VFM42UBK	C4VFMC3042UBK
44U	C4VFM44UBK	C4VFMC3044UBK

Where the C4VFM Series Works Best

- C4 server cabinet installations
- Data centers and IT rooms
- Network and telecom environments
- Enterprise infrastructure deployments
- High-density cabinet-based systems

Best Applications for the C4VFM Series

- Managing vertical cable runs inside C4 server cabinets
- Supporting structured cable routing in enclosed racks
- Organizing high-density patching environments
- Improving airflow and serviceability within cabinets
- Maintaining clean and professional installations
