

Rack to Ladder Rack Adapter Cable Runway Mount *CLRAP Series*

Adapter plate designed to securely connect ladder rack systems directly to racks and cabinets for structured cable routing.

Key Features and Benefits

- 14-gauge steel construction provides durable structural connection between rack systems and ladder rack pathways.
- Integrated 2in elevation provides durable rack-to-ladder rack mounting while eliminating the need for separate height adapter kit.
- Designed to securely mount ladder rack directly to racks or cabinets, creating a clean transition point.
- Simplifies installation compared to multi-component transition assemblies.
- Supports proper alignment between rack and ladder rack systems for organized cable routing.
- Compatible with standard ladder rack systems and EIA-compliant racks.
- Provides a compact alternative to larger transition kits where space is limited.
- Enables direct integration of overhead cable routing systems with rack infrastructure.
- Ideal for telecom rooms, data centers, and network installations requiring efficient rack-to-runway transitions.
- TAA-compliant, manufactured in North America supports government procurement requirements and ensures consistent quality.
- Black powder coat finish (GREENGUARD, TSCA, RoHS compliant) supports environmental and durability requirements.

The CLRAP Series adapter plates provide a simple and effective solution for connecting ladder rack systems directly to racks and cabinets. Designed for structural alignment and secure mounting, they create a clean transition between rack-mounted equipment and overhead cable pathways.

By simplifying installation and reducing the need for additional components, the CLRAP Series supports efficient and scalable cable routing systems in data center and telecom environments.

Part No.	Ladder Dimensions			Ladder Size Support			
	Height	Width	Depth	6in	12in	18in	24in
CLRAP	2.00	20.25	1.50	Yes	Yes	Yes	No
CLRAP24	2.00	26.25	1.50	Yes	Yes	Yes	No

What's Inside the Box

Qty Included	Description	Replacement Part No.
1	Top of Rack Adapter	
1	J-Bolt Kit (Pair)	CLJBK

Where the CLRAP Series Works Best

- Data centers and server rooms

Best Applications for the CLRAP Series

- Connecting ladder rack directly to racks or cabinets

- Telecom and network installations
- Open frame rack environments
- Ladder rack deployments requiring direct rack mounting
- Structured cabling systems
- Creating clean rack-to-runway transitions
- Supporting overhead cable routing systems
- Simplifying ladder rack installation at rack locations
- Improving alignment and stability of cable pathways
