

Rack Mount Monitor Bracket Adjustable Depth VESA Mount *RB-MMB*

Series

Adjustable rackmount monitor bracket designed to securely mount displays inside standard 19-inch rack systems.

Key Features and Benefits

- 16-gauge steel construction provides durable support for rack-mounted monitors and displays.
- Vertical slots support standard VESA mounting patterns, enabling compatibility with most displays.
- Adjustable depth design allows mounting flush, recessed, or forward of rack rails for optimal viewing.
- Mounts directly to standard 19 in EIA-compliant rack rails for universal compatibility.
- Includes mounting hardware for attaching the display to the bracket.
- Occupies 4U of rack space, providing adequate area for monitor installation.
- Ideal for integrating monitoring, control interfaces, and local display access within racks.
- TAA-compliant, manufactured in North America within an ISO 9001 certified facility.
- Black powder coat finish (GREENGUARD, TSCA, RoHS compliant) supports environmental and durability requirements.

The RB-MMB Series rack mount monitor brackets provide a flexible solution for integrating displays into standard 19-inch rack systems. Designed with adjustable depth and VESA compatibility, they allow monitors to be positioned for optimal visibility and accessibility. By enabling direct monitor mounting within racks, the RB-MMB Series supports system monitoring, control interfaces, and local management in data centers, telecom rooms, and industrial environments.
