Key Features and Benefits

- 18-gauge steel shelf with 14-gauge mounting brackets supports up to 85 lb (39 kg), providing reliable support for electronic chassis and custom-built equipment.
- Designed for four-post mounting, distributing equipment weight across both the front and rear rack rails for increased stability.
- Can be installed as a fixed support shelf or paired with RSLIDE Universal Slide Rails to create a pull-out chassis platform for easier servicing and maintenance.
- Compatible with cabinets using two pairs of combination rails. Traditional four-post racks can be adapted using the optional **FSRA** Fixed Shelf Rail Adapter.
- Includes all required mounting hardware for quick installation.
- Manufactured in North America.
- TAA-compliant for U.S. federal procurement.
- White powder coat finish. GREENGUARD, RoHS, and REACH compliant.

The RASC Series was designed to provide stable four-post support for electronic chassis, industrial equipment, and custom rack-mounted assemblies. Unlike traditional cantilever shelves, the shelf mounted to both the front and rear rack rails, improving load distribution while allowing the shelf to be converted into a pull-out assembly when used with Hammond's RSLIDE universal slide rails.

Although the RASC Series has been discontinued, it remains a useful reference for existing installations. For new projects, Hammond recommends the RF Series Heavy-Duty Fixed Rack Shelf, which offers greater load capacity, improved versatility, and current production availability.

Please note that to mount this product, you must have two (2) pairs of combination rails within your cabinet. To mount this product to a traditional equipment rack, please order the FSRA or see our RAAB Series.
