HF RFID & UHF RFID

The Linea Pro Rugged for iPhone 13 & 14 features an optional RFID reader which supports HF RFID and UHF RFID class 1 generation 2. It also supports Apple VAS and Google Smart Tap for a seamless contactless card reader experience.

COMPACT DESIGN

The ultra-compact size allows for employees to stay connected while still on the move. The lightweight and slim design keeps this device both comfortable to carry and easy to operate while maintaining a quick workflow.

1D/2D BARCODE SCANNING

Linea Pro Rugged for Phone 13 & 14 utilizes a optical high-performance imager capable of reading 1D/2D barcodes with speed and accuracy under any lighting condition. Support for a wide range of barcode types, as well as the multi-scan feature, offers excellent versatility, optional extended range (30ft) engine available.

HOT-SWAPPABLE BATTERY

Easy to change hot-swappable battery provides a back-up charge to the iPhone making for 24/7 workflow. With the power of 2400mAh, the hot-swappable battery keeps your operation powered around the clock.

Certified Rugged

The durable hardware is suitable for any industrial environment and features an IP65 rating to protect against dust and moisture. It also has a MIL-STD-810G drop rating.

COMPREHENSIVE SOFTWARE

This device is compatible with a range of software platforms and includes an SDK to integrate into existing platforms without difficulty. Our suite of software tools helps you get the most out of your device, from data population to printing. The Linea Pro Rugged for iPhone 13 & 14 simplifies the software integration process.
